Forecast for Tuesday 04 Apr 2023

Weather: Patchy high cloud across the region will give hazy sunshine at first for most. Low cloud will increasingly push in from the west through the day, this affecting the west of the region during the morning and across all parts by early afternoon. This will bring some patchy light rain at times but turning more persistent, and with some heavy bursts, later in the evening.

Chance of cloud-free hill tops above 800m: 80% around dawn, decreasing to 40% in the west during the morning and then the east into the afternoon.

Low Cloud and visibility: Low cloud, bases 600-800m, gradually pushing in from the west through the day. Temporary reductions in visibility to moderate in any heavier rain, mainly later in the evening.

Met Office Aberdeen Meteorologist's View
Feeling cold at height in the strong winds.

Forecast for Wednesday 05 Apr 2023
Weather: Low cloud lingering across the region during the morning with outbreaks of rain, heavy at times. This mostly clearing into the afternoon, although some patchy cloud may linger at first, but becoming dry.

Maximum wind: Southerly 15-20 mph, gusting 30 mph, easing into the afternoon.

Chance of cloud-free hill tops above 800m: 20-30% during the morning, increasing to 80% into the afternoon.

Low Cloud and visibility: Low cloud, base 600-800m, in association with the rain, with moderate visibility in heavy outbreaks. Good into the afternoon.

Temperature: **Glens:** Plus 6 rising to plus 10 Celsius.
At 800m: Plus 2 rising to plus 5 Celsius.
Freezing level: Above summits.
